ABOUT ME

Since 2020 I've been developing my skills in Frontend Development – an area that quickly became my passion. I've worked on several commercial projects where I gained hands-on experience with TypeScript, React, Vue and modern tooling, continuously improving my approach to creating clean, scalable and user-friendly interfaces.

I enjoy exploring technologies beyond frontend, especially around full-stack concepts with Next.js and databases, which helps me better understand how modern web applications work.
